Please find attached RAI Env-08 for the PSEG Site ESP Application. The Env-08 RAI corresponds to the rMET draft RAI that was provided to you on July 20, 2012 as part of a complete table of draft RAIs. There were no requests for clarification on the rMET draft RAI; hence we are issuing this RAI as final.

The schedule we have established to the review of your application assumes technically correct and complete responses within 30 calendar days of receipt of RAIs. For any RAIs that cannot be responded to within 30 calendar days, it is expected that a date for receipt of this information will be provided to the staff within the 30-day period so that the staff can assess how this information might impact the published schedule.

Please contact me if you have any questions.

Request for Additional Information Env-08

Issue Date: 8/31/2012

Application Title: PSEG Site ESP Environmental Review - Docket 52-043

Operating Company: PSEG Power LLC, PSEG Nuclear LLC

Docket No. 52-043

Review Section: ESP EIS 2.9 - Meteorology and Air Quality

Application Section: ER

QUESTIONS

ESP EIS 2.9-1

rMET-09: Provide information about emission factors of PM2.5.

Supporting Information: Under ESRP 5.8, the following data or information should be obtained:

“predicted noise levels and nonradiological air pollutant levels at sensitive areas as identified above (from the ER).”

ER Section 5.8.1.4 describes AERMOD calculation results and provides the emission factor for PM10, but does not provide emissions data for PM2.5. Additional information is needed to clarify how the AERMOD calculation was performed for PM2.5.
