SUMMARY

Regarding ARC's request in letter dated May 16 that pertained to plans to perform roof repairs on buildings 100,200, and 300, please submit responses to the following questions, and revise and submit SOP-42 accordingly:

1. Describe expected amount of time that it will take to complete the work.
2. Describe the types of surveys that will be performed of the workers after they complete their work each day. Include action levels and actions that will be taken if thresholds are exceeded.
3. Describe program for conducting bioassays of workers to evaluate for intake of radionuclides.
4. Describe surveillance and monitoring of the workers by ARC personnel while work is being performed on the roof.
5. Describe how you will determine if waste generated from the work is, or is not, contaminated, and further describe who will handle the waste and how and where it will be stored on ARC property for disposal.
6. Describe PCE that workers will wear in order to prevent and/or limit personnel contamination.
7. Describe actions levels for contaminated clothing and ARC's plans to either decontaminate the clothing, or store it as radwaste for disposal.

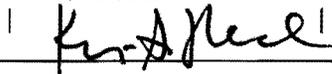

Verify that all of the above items will be incorporated into the training program before work is conducted, and will be discussed with the company that is awarded the contract to perform the roof repairs on each building.

ACTION REQUIRED

Submit response to the request for add'l info noted above. Submit a revised SOP-42 accordingly.
