Dear Sir or Madam:

The purpose of this letter is to provide an update on the status of the installation of the new cyclotron effluent monitoring system described in the subject license. We had initially anticipated that the new system would be operational in 2012. However, we are encountering some difficulties with the construction of the structural steel on the building exterior for the stack re-location. Consequently, although the current estimated timeline for commissioning the new system is November 2012, it is likely that full commissioning will not occur until 2013.

In the interim, effluent monitoring continues to be done by manually changing out and analyzing samples from the existing PING system each workday.

If you have any questions concerning this matter, please contact me at 301-496-2254.

Nancy E. Newman

Radiation Safety Officer, NIH
