A.2 TASK ORDER STATEMENT OF WORK

Background

The Nuclear Regulatory Commission (NRC) currently has an extensive online courseware library developed using a variety of technologies. As regulations change and subject matter is edited, NRC’s courseware needs to be updated. NRC requires the vendor to provide a courseware maintenance program in order to keep the NRC courseware library up-to-date.

Objective

The objective of this Task Order is for the maintenance of existing NRC courseware. Specific tasks include updating course content and audio, and modifying the courseware, as necessary, to ensure compliance with Section 508 requirements.

Previously developed courseware has been developed in a variety of tools. We expect that NRC and the vendor will mutually agree on the toolset to be used for any updates; recognizing that the vendor may not have access or ability to update courses developed using unavailable toolsets.

Tasks

- The NRC Contracting Officer’s Representative (COR) will submit a word document for each course, which identifies the text and audio changes to be incorporated, as well as any other special requested changes.
- Vendor must propose measures to incorporate required revisions and enhancements.
- The COR must approve the vendor’s proposed measures for revisions and enhancements within **5 days of receipt of proposal from the vendor.**
- As requested, the vendor must incorporate the requested changes and deliver a SCORM or AICC courseware package to the COR for loading into the iLearn Staging environment
- The NRC iLearn team shall conduct functional testing and provide any requested changes
- The vendor must incorporate requested changes and deliver a final courseware package to the COR for loading to the iLearn Production environment

All courseware updates must be developed using Adobe Captivate or other course authorizing tools that the NRC and Vendor have mutually agreed upon in advance. Courseware updates will be based on existing courseware and training content provided by the NRC. Courseware updates will utilize the existing voice-over narration to whatever extent possible, but may require voice-over updates. All courseware updates must function correctly on the NRC’s LMS, Plateau-based iLearn system.

Deliverables

- Vendor must provide proposed measures for incorporating NRC requested revisions and enhancements within 7 days of request, unless otherwise specified by the COR.
- Vendor must provide final courseware package within 7 days of final NRC requested revisions and enhancements, unless otherwise specified by the COR.
