Material Control, ISSFI, and Decommissioning Branch

**SUBJECT: NRC STAFF REQUEST OF ADDITIONAL INFORMATION REGARDING
REMOVAL OF MATTHAEI BOTANICAL GARDENS FROM LICENSE
(CONTROL NO. 577396) IN LETTER DATED APRIL 12, 2012 (ML12111A079)**

The licensee's management team was contacted to obtain additional information regarding their request to release the Matthaei Botanical Gardens facility.

During a review of the April 12, 2012 document, NRC noted the letter did not contain radiological surveys results, diagrams of the facility, screening value release comparisons or the total quantity of licensed material used at the facility.

The licensee stated that they would provide NRC the above information by September 21, 2012.

The NRC stated that once the new information was received, NRC can make an evaluation to determine if additional information would be necessary to complete the licensing action.

End of call.
