MEMORANDUM TO: Alexander R. Klein, Chief  
Fire Protection Branch  
Division of Risk Assessment  
Office of Nuclear Reactor Regulation

FROM: Charles E. Moulton, Fire Protection Engineer */RA/*  
Fire Protection Branch  
Division of Risk Assessment  
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF THE AUGUST 23, 2012, CATEGORY 2 MEETING  
REGARDING NATIONAL FIRE PROTECTION ASSOCIATION  
STANDARD 805: NUCLEAR REGULATORY COMMISSION/NUCLEAR  
ENERGY INSTITUTE MANAGEMENT DISCUSSION

On August 23, 2012, the U.S. Nuclear Regulatory Commission (NRC) Division of Risk Assessment (DRA) management held a meeting with Nuclear Energy Institute (NEI) management to discuss questions requiring management attention related to National Fire Protection Association Standard 805 (NFPA 805).

The participants discussed, at a high level, the following topics:

- NRC schedule for completing NFPA 805 application reviews
  - DRA management presented an updated schedule for the completion of safety evaluations for those applications which have completed the acceptance review process.
  - DRA management stated that the goal is to complete the review of each application within two years.
  - DRA management stated that licensees should notify the NRC as soon as possible if there will be a delay in submitting an application.
- Fire modeling input files
  - NEI requested a discussion of the NRC's use of fire modeling input files in the NFPA 805 application reviews, including whether these files should be considered sensitive or proprietary.
  - DRA management and NEI agreed that an agenda item would be added to the next meeting to discuss this issue.

NEI inquired about a Generic Letter the NRC is developing concerning fire-induced multiple spurious operations. DRA management stated that the NRC is following its process in developing the Generic Letter, but discussion of the topic was outside the scope of the current meeting.

CONTACT: Charles Moulton, NRR/DRA  
(301) 415-2751

NEI stated that a description of a new process to resolve Unreviewed Analysis Methods for Probabilistic Risk Assessments would be sent to the NRC shortly.

NEI requested that the NRC staff who are participating in NEI's Fire Protection Information Forum submit their presentations as soon as possible.

The participants agreed that the next meeting would take place on September 20, 2012, as a teleconference.

The meeting handout is available in the Agencywide Documents Access and Management System. The review completion schedule is available at accession number ML122360232.

A list of meeting attendees is enclosed with this memorandum.
