**Subject:** relicensing comments

Dear NRC Staff,

Please do NOT relicense Indian Point Reactors 2 and 3. We can LIVE without it!  
Our short-term repositories for spent uranium fuel (two thirty-foot deep pools of water) are vulnerable to either seismic activity, a terrorist attack, or simple malfunction, and are over-packed with still highly radioactive fuel rods.

The risk of continuing for another twenty years is too great. Please protect the well-being of the entire Hudson Valley and NYC.

Sincerely,

Vitalah Simon
