To: Docket, Hearing
Subject: nuclear power plants

Indian point is a ticking time bomb. We used to live in Peekskill,
a good friend of ours worked at Indian Point, he died due to cancer. this goes back 45 years.
I cannot understand how ruthless a company can be, having no conscience killing millions
of Americans, it will happen, it is just a matter of time.
It is a crime that our government does nothing for the safety of the people and the environment.
