Subject: power plant

please please please don't let them play roulette with our lives anymore. Please lets decommission these aging plants and buid no more. Wasn't Fukushima a lesson enough. And what about Chernobyl? and three mile island? Enough is enough. we are scared. All of us. We don't want nuclear power. we'd rather go back to the horse and buggy. And candles. Like my grandmother and my mother . Please. Viva Hoffmann.
