Subject: Indian Point

My children and grandchildren, neices and nephews and son-in law, will all be fried in Manhattan if Indian Point doesn't close down. I used to play golf with my father at Sleepy Hollow Country Club where you can see the reactors from one of the T offs. It's just a few miles from Manhattan with a couple of bridges ouf of town and milions of people in town. I will be without a family and I'm 74 years old. I love my children and grandchildren. I don't want them to get sick and die from radiation. it's unnecessary. i'm writing again because I just reread Hamilton Fish's letter and realize where Indian Point is. I've been writing a memoir for awhile about my days as an Andy Warhol Superstar and I had included lots of material about nuclear power. I'm really up on the subject. there's no good reason for that Plant. Two of the domes have been cracked for decades. They said they couldn't afford to replace them with the intact domes they had in storage. Really! A horse and buggy and some candles will at least keep my kids alive. thank you. viva

DOCKETED
USNRC

September 11, 2012 (11:08 a.m.)
