Subject: Indian Point Relicensing

I understand you are inviting public comment on the re-licensing of the Indian Point nuclear facility at Buchanan. Though I realize there are members of the community who depend on Indian Point for their livelihood, there is no amount of jobs which justifies the dangers involved in the plant's operation. The disaster at Fukushima, the storage of the spent fuel, the earthquake danger, the age and condition of the plant and the lack of any viable evacuation plan all make it imperative that Indian Point be closed as soon as possible.

Please put the safety of the tri-state area at the top of the list of your concerns and heed the science and sense of the arguments to close Indian Point!

Sincerely,

Alice Matthews
