Subject: Indian Point

I am writing as a resident of Nyack, NY to call for the Indian Point Nuclear Power Plant to be shut down. Millions of us the region are at risk of a massive meltdown disaster and the evacuation plan is unworkable. Radioactive waste stored in unfortified containers leak contaminants into the river. Cooling water intakes at Indian Point kill millions of fish and other organisms. According to a study by Riverkeeper and the NRDC we can do without the power from Indian Point. There would be a surplus through 2020, and the region "could replace Indian Point many times over with investments in renewable energy, efficiency and transmission." It is time to shut it down.

Sincerely,

Marcy Denker
