Subject: S D I P Shut Down Indian Point

TO WHOM IT SHOULD CONCERN:

Today's reminder that we Americans are at terrible risks from those who would hurt us even as was done eleven years ago today!!!

Indian Point contemporary as it is to Japan's Fukushima in design, construction and age, is an easy target for our enemies. Onsite storage is an opportunity for a commercial plane loaded with explosives to veer off landing pattern "glide path" to Teterboro or Newark Liberty Airports from the west side of the Hudson River just opposite Indian Point and, within 30 seconds, demolish the plant, storage thus killing many of us!!!

Of course, its continued use situated on known ground faults (on which those reactors would now never be permitted) earthquakes would be declared "an act of God". Does Entergy, a foreign national corporation, have adequate insurance to provide coverage for any damages, injuries or deaths or would they simply declare bankruptcy?

As a devoted Grandfather of our family with seven of our grandchildren still living within this area, in the name of common sense it is respectfully submitted these both reactors together any storage be removed or converted perhaps to fuel oil or natural gas to continue to provide requisite electrical supply.

Yours truly,

--
