Subject: Renewal of Entergy's Indian Point Nuclear Facility

My name is Jeanette Gould. I live in Peekskill, New York within minutes of the Indian Point Reactor. I stand with Riverkeeper, Clearwater, and the National Resources Defense Council in opposing the relicensing of this dangerous and ancient facility. I fear for my safety and that of my community in the event of a disaster there, due to its inadequate evacuation plan. I have studied the effects of Entergy's removal of and return of water to the Hudson River. They are multiple, irresponsible, and avoidable.
