Subject: Close Indian Point

I live 5 miles away in Croton-on-Hudson and am really petrified of living so close to Indian Point. I am very concerned that there is no workable evacuation plan. It is also killing tons of fish every year. You are putting everyone at risk. It would really improve my quality of life just knowing Indian Point is closed. I think many people would opt to somehow reduce energy consumption if they knew this potentially deadly plant would close. Thank you.
