Subject: Indian Point

Good Afternoon ,

My understanding is decision time is coming regarding Indian Point. The plant has outlived it's safe operational lifetime (not mention it's designed life expectancy) and poses a huge risks. The plant is a disaster waiting to happen. You have the power act for the safety millions. It's time to shut it down. I am a believer in Nuclear power, but only executed at zero risk to the population with modern practices and this is not the case where Indian Point in concerned.

Thank you for your consideration,

V/r
Evan Wellens
