Docket, Hearing

From: Bob Rodriguez [bobrodriguez@mac.com]
Sent: Thursday, September 06, 2012 4:09 PM
To: Docket, Hearing
Subject: Close Indian Point

To whom it may concern,

Indian Point is old, dangerous and near more people than any other nuke plant in the country. The Nuclear Regulatory Commission has given Indian Point more safety waivers than it can remember and its own data shows IP poses the greatest risk of reactor core damage due to earthquake in the country. There's no plan for evacuating people in the danger zone. This is reason enough to close the plant. Please use common sense.

Sincerely,

Robert Rodriguez
