**To:** Docket, Hearing  
**Subject:** Indian Point - A Disaster Waiting to Happen

Please take note of my fervent desire that the Indian Point Nuclear plant be closed immediately. The main reason for this is that the plant, like others throughout the world, continuously generates radioactive waste and there is no plan for disposing of this in any safe way. My second objection to the plant is it's location. The evacuation plans proposed are totally ridiculous and seem to have been created by people who do not live in the metropolitan area. Should evacuation ever be called for, I believe that the resultant panic and rush would soon overwhelm roads, bridges, railroads and bus lines and result in gridlock and possibly in multiple injuries and deaths.
