Subject: Time to use alternative sources (wind, water, sun) and close Indian Point

To All,

It's time to count our blessings (since 1973). Shut down Indian Point Power Plant and start clean up the nuclear waste. Our communities have benefitted from an inexpensive fuel source using the nuclear energy generated at Indian Point. Let's count our blessings and begin the process to shut down the power plant and fuel up the solar/wind mills/under water generated energy to bring our communities a safer, healthier life style.

This is succinct, as succinct as an accident that would wipe out life and habitat within a 200 (not just 10) mile radius.

Respectfully,
Ann Donzella Owens, teacher, professor, community leader
