Docket, Hearing

From: Sharon Barbell [sharbell@earthlink.net]

To: Docket, Hearing
Subject: Indian Point

To Whom it May Concern,

Due to Indian Point's vulnerability to terrorism, a laundry list of safety problems, the storage of 1500 tons of radioactive waste onsite, and the lack of a workable evacuation plan, I beg you to please consider closing this extremely dangerous nuclear power plant. It makes no sense to keep it open one more minute. The Indian Point nuclear plant is an ongoing ecological disaster and a looming risk to millions who live in its shadow. Its systems have degraded and are eroding; radioactive water leaks into the Hudson River, which is appalling; and if that isn't enough, human and animal lives have not only been taken, but are at continued risk. Moreover, we don't even need the power!

Please close this abomination. It's a crime and a massive disaster waiting to happen.

Thank you.

Sincerely,
Sharon Barbell
