Subject: Indian Point

To Whom It May Concern,

I am requesting the closing of Indian Point Power Plant. This power plant is a danger to everyone in the tri state area. Terrorists can easily access it and with the crazy weather patterns we have been getting we could end up with another Fukushima Daiichi here in the United States and Millions of people would be affected. What I would suggest is to close this power plant down and create a place for alternative energy, either a wind farm or a solar power area to provide the same amount of electricity as the plant does now. The destruction of fish and also the constant poisoning of the Hudson River is another reason to close down the plant. This plant is not a positive in this area it is a total negative and something that I have never felt comfortable being around. Thank you for your prompt attention to this matter. Sincerely yours, Cynthia Soroka-Dunn
