Subject: Indian Point

Hello,

Accidents of all sizes continue to occur at nuclear power plants. Cancer rates are up. Many square miles are uninhabitable in Fukushima and Chernobyl.

We do not need to take this huge toll to our health and our property with the wind, solar, geothermal and wave technology we have. The plants would not exist if not for the Price-Anderson Act.

Indian Point is considered the plant at our country that is most at-risk from earthquake. The NRC has ignored the newly discovered fault line. It is time to say no to this incredibly dangerous technology for boiling water. People before profit.

--

Thanks,
- Gail
