**To:** Docket, Hearing  
**Subject:** Indian point

I urge you not to relicense Indian Point. A nuclear facility so near to NYC is an invitation to disaster. In the event of an emergency, there is no possibility of safe evacuation. The sheer number of people who are likely to suffer ill effects from a nuclear accident is enormous. The plant is aging and the pool of spent fuel is growing. The facility uses a vast amount of Hudson River water at a time when the health of this river is still precarious although it is beginning to be restored. An accident is inevitable.

After witnessing the situation in Japan, it is imperative that we move toward less reliance on nuclear energy. Please promote alternative energy resources and do not relicense this facility.

Sincerely,  
Barbara Chutroo
