**Subject:** Indian Point - New York

TO: Nuclear Regulatory Commission  
Washington, DC  
via email

As a proud American citizen and resident of Westchester County, New York, I am writing to express my concern over the Indian Point Power Plant.

Recently, I was made aware that the facility is past it's useful life, that the pools holding the spent fuel rods are vulnerable, and that a proposal for long-term storage of the rods does not include the necessary level of safety.

Indian Point lies in an area that is densely populated, and has no workable plan to evacuate residents in the event of a nuclear disaster.

It is time to close down Indian Point and take whatever precautions necessary to store its radioactive materials in the safest manner possible.

Sincerely,  
Len Martello
