SUBJECT: DEPARTMENT OF ENERGY PRIME CONTRACTOR EXEMPTION
UNDER 10 CFR 30.12

Dear Mr. Chisholm:

The Nuclear Regulatory Commission received a letter dated August 28, 2012, from you on behalf of National Security Technologies (NST), a prime contractor with the U.S. Department of Energy (DOE) Nevada National Security Site, requesting authorization to conduct training in Fort Worth, Texas, using radioactive sealed sources during the week of October 1, 2012, under a 10 CFR 30.12 exemption. The objective of the training is to develop the knowledge, skills, and confidence of first responders from local jurisdiction in preventing and responding to radiological/nuclear weapons of mass destruction events.

The NRC regulations provide an exemption in 10 CFR 30.12 to any prime contractor of DOE at a government owned or controlled site, such as NST. However, if the prime contractor or subcontractor is performing work for DOE at another location which is not a government owned or controlled site, then the Commission needs to determine whether the exemption is authorized by law and whether, under the terms of the contract, there is adequate assurance that the work thereunder can be accomplished without undue risk to public health and safety.

In this particular case, NST has requested to conduct work activities in an Agreement State. Under a Commission Policy Statement (46 FR 7540, January 23, 1981), Agreement States may issue case-by-case exemptions only upon a joint determination by the State and the NRC that the necessary findings have been made; hence the requirement in Texas' regulation that the determination of the grant of a specific exemption be made jointly with the NRC.

The NRC has reviewed the salient parts of NST's prime management and operating contract with DOE. The review determined that the exemption under 10 CFR 30.12 is authorized by law. Additionally, the procedures submitted by NST for conducting work activities in the state of Texas were reviewed. Based on this review, the NRC and the State of Texas have determined that there is adequate assurance that the activity can be accomplished without undue risk to public health and safety. Therefore, the exemption under 10 CFR 30.12 is authorized by law.

Bruce W. Chisholm
