To: Docket, Hearing
Subject: Close Indian Point now

The Indian Point nuclear power plant presents an ongoing threat to the local environment due to its water use and disposal and its on-site storage of spent fuel. Moreover its location in the middle of one of the most heavily populated regions of America renders any notion of dealing with a nuclear disaster through orderly evacuation laughable.

The anxiety of the plant's workers for their jobs is understandable but not dispositive. They should be pensioned off as a legitimate cost of developing a saner, safer energy usage policy.

Thank you.
