**To:** Docket, Hearing  
**Subject:** Indian Point

I am writing this to protest any relicensing of Indian Point. The facility is too close to a densely populated area including being only 25 miles from NYC. Spent fuel rods are still on the property since the Yucca Mountain spot was not made available. Evacuation plans are Inadequate and Impossible to make with the density of population. It has been said that personnel are Inadequately trained, hence there is a suit pending. Furthermore, the cancer rate is higher in this area than normal.

Please listen to the protests so both fish and people can prosper in the area.
