Subject: indian point

Today particularly following 9/11 11th and the killings of our ambassador in Libya can we take a chance that some group will target our nuclear plant. I remember the photos you caught someone taking in the immediate aftermath of the WTC disaster. I remember the run on the iodide tablets when we thought our children could be radiated. There has got to be another solution. Regulate but dont disintegrate our human beings in the process.

Barbara Melamed, PhD a former Mamaroneck NY resident for over 20 years and an admirer of our former Senator and Current Sec of Defense.
So the message is Defend us in another way.

my family and yours
