**To:** Docket, Hearing  
**Subject:** indian point

We favor closing Indian Point as the regrets if an accident happens would be catastrophic. With climate change bringing changing weather patterns, sea rise and with earthquakes inevitable, the possibility of an accident must be prevented by closing Indian Point. The density of population and the impossibility of evacuating people through already overused roads would be impossible. We have to do the only sane thing and that is to close Indian Point. We have the possibility of alternative energy, hydroelectric power, wind power and increasing the use of solar power in the region to offset a good deal of the energy now provided by Indian Point. The other problem that would be eliminated is how to get rid of the waste and the increased water temperatures and near the outlets at Indian Point into our beloved Hudson River. Thank you. Paula and Jerome Spector, Chester, NY. 10918
