Docket, Hearing

Subject: Indian Point

To whom it may concern:

Unfortunately, I can think of too many reasons for shutting down Indian Point once-and-for-all. Just a few then: How about sparing New York City that catastrophic accident waiting to happen? Or: What about unplanned spills, leaks, etc.? Or: What have you against fish? Or: What do you find lovable about radioactive nuclear waste?

And so on...

Please think, also, about the evacuation plan that doesn't exist. And stop selling us out to the high bidders who are the real writers of most legislation in our broken Republic.

Sincerely,

Gordon Rogoff
