Dr. Jorge Solis

Jorge Solis is a Senior Thermal Engineer in the Division of Spent Fuel Storage and Transportation here at the NRC. He holds a PhD in Nuclear Engineering from the Pennsylvania State University. Dr. Solis has performed complex CFD and finite element analyses of thermal-hydraulic problems, over 10 years of experience performing technical reviews of spent fuel storage and transportation casks and spent fuel dry storage facilities, and more than 20 years of engineering experience which includes experience in nuclear engineering (nuclear fuel management and thermal hydraulic design, and transient and accident analysis of commercial nuclear power plants) and review of radioactive materials and spent fuel storage and transportation packages.

Ray Termini

Raymond P. Termini has been working in the nuclear field since 1976. He was involved in the initial construction work at LaSalle County Nuclear Generating Station and worked in Plant Operations for 22 years, moving through a succession of Operations positions from non-licensed to licensed Operator to Senior Reactor Operator.

Ray received his Bachelor of Science degree from Northern Illinois University in 1988, and obtained his Master's degree in Project Management in 1997. Ray began managing nuclear projects related to Exelon's reactor outages and modifications in 1998 and eventually moving to Dry Fuel Storage project management work in 2004. In 2008, he was selected to manage implementation and support activities associated with Exelon's expanding number of Independent Spent Fuel Storage Installations (ISFSIs).

Suzanne Leblang

Suzanne Leblang currently serves as the Fleet Dry Storage Coordinator for the Entergy nuclear fleet. Currently, Entergy has 8 operating units which have implemented dry fuel storage, 1 ISFSI at a shutdown reactor site and 1 ISFSI under construction. Suzanne began working with dry fuel storage projects in 1993 at Palisades, the first user of a general license, where the initial loading of VSC-24 casks took place. In addition, Suzanne serves as the current and past chairperson of the *EnergySolutions* (VSC-24) Owners Group, current chairperson of the Holtec Users Group (HUG), past chairperson of the Transnuclear NUHOMS Users Group, member of the NEI Dry Storage Task Force, and Vice Chair of the EPRI Used Fuel High Level Waste Technical Advisory Committee.
