Notification of Readiness for NRC 95001 Inspection

Reference: NRC letter to NextEra Energy Point Beach, LLC, dated July 24, 2012, Final Significance Determination of a White Finding with Assessment Followup and Notice of Violation; NRC Inspection Report Nos. 05000266/2012504 and 05000301/2012504; Point Beach Nuclear Plant, Units 1 and 2 (ML12206A514)

By letter dated July 24, 2012 (Reference), the Nuclear Regulatory Commission (NRC) informed NextEra Energy Point Beach, LLC (NextEra) of plans for a future inspection of Point Beach Nuclear Plant (PBNP), in accordance with Inspection Procedure 95001, "Supplemental Inspection for One or Two White Inputs in a Strategic Performance Area," for the logic error in a NextEra Emergency Plan Implementing Procedure. Additionally, the NRC determined that NextEra did not initiate protective action recommendations when the projected dose to an individual was 1 rem beyond the 10-mile plume exposure pathway.

This letter is to notify the NRC that PBNP will be ready for the 95001 inspection on January 7, 2013. Accordingly, NextEra requests the NRC to commence the 95001 inspection on January 7, 2013.

This letter contains no new Regulatory Commitments and no revisions to existing Regulatory Commitments.

Very truly yours,

NextEra Energy Point Beach, LLC

Larry Meyer
Site Vice President
