

**Docket, Hearing**

---

**From:** Judy Azulay [judyazulay@frontier.com]  
**Sent:** Friday, September 14, 2012 11:02 PM  
**To:** Docket, Hearing; Siarnacki, Anne  
**Subject:** Objections to new Indian Point licenses/Relicensing

Indian Point's continued operation not only threatens residents' safety in general, but specifically violates federal law and environmental justice, because it disproportionately threatens the safety of the very young, the very old, lower-income and minority residents.

Children in day care, people living in shelters, seniors in assisted living facilities and nursing homes and other institutionalized populations living near Indian Point are more or less ignored by current radiological emergency planning. Largely lower-income and minority residents, in the event of a serious accident at the plant, they would lack access to transportation, potassium iodide or even adequate provision to shelter in place, and are often not covered under any evacuation plan whatsoever, let alone a workable one.
