LISLE, ILLINOIS 60532-4352

SEP 04 2012

Bradly Keck, Ph.D.  
Radiation Safety Officer  
Analytical Bio-Chemistry Labs, Inc.  
7200 E. ABC Lane  
Columbia, MO 65202

Dear Dr. Keck:

It has come to our attention that an omission existed in Amendment No. 44 to your NRC Materials License No. 24-13365-01 dated May 18, 2012. You and I discussed this omission by telephone on August 24 and 28, 2012. The omission involved the need to clarify your possession limits authorized in Item 8.A. of the license to maintain certain isotopes under the threshold screening values that would otherwise require special marking of the license. Thank you for your help and patience in this matter and we apologize for any inconvenience this may have caused you. Please find enclosed Corrected Copy of Amendment No. 44 of your license.

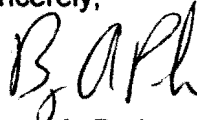

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U. S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

A handwritten signature in black ink, appearing to read "B. A. Parker". The signature is written in a cursive style with a large initial "B" and "P".
