Subject: Indian Point needs to shut down and be resolved, removed

Friends, fellow humans,

Close Indian Point! It has NO SAFE EVACUATION POSSIBILITY!!! and is only miles from my Grand child, daughter, son-in-law and millions of other wonderful people.

1- Serious Problems:

- multiple transformer explosions
- a major steam pipe rupture
- clogged cooling system intakes
- repeated siren failures
- is a sitting target for terrorism.

2- Dangerously Over-Crowded Fuel Pools: The plant's spent fuel is highly radioactive and contains about three times the radioactivity as Fukushima's spent fuel pools.

3- On-Site Waste Storage: there is no other repository on the horizon. Indian Point is now storing 1,500 tons of highly-radioactive spent nuclear waste on-site,

4- Health and Environmental Impacts: Studies have shown increased rates of cancer and other illnesses related to exposure from planned and unplanned releases of radioactivity.

5- Evacuation is Impossible: earthquake, a terrorist attack, or a fuel pool fire or other accident etc

6- Replacement Energy is Readily Available: energy efficiency and renewabies, repowering and improved storage and transmission capability.

Governor Cuomo's Energy Highway is currently addressing ways to bring excess power, including 4,000 megawatts of wind in the western part of the State, to the greater NY metropolitan area. In January 2012.

YOUR JOB IS TO PROTECT THE INNOCENT AND VULNERABLE IN SOCIETY !

Thanks,

Mighty Xee
