James,

FYI that at Friday's EDO management meeting, CFO mentioned that a waiver will be sought. So, there's more to do with regards to the current option. We'll be on standby for the kick-off meeting for the new contract.

Have a great week, Susan

As I understand it, everyone is comfortable with the current option. I want to make sure we do our homework for the next one. In particular, we need to clearly understand the agency's requirements for location and food. With the requirements in mind, I am confident we can develop a strategy to meet our needs. Steve Pool is already working with your folks on the next contract. I'm not too familiar with the work. It would be good to get together and have a "kick off" meeting.

James,

in light of M 12-12, I think we should meet, DC and NRR, to discuss the impact of the memo on the RIC. I'd like to especially focus on option 2 of the current contract which we just exercised to make sure that we are aligned. Do you agree?

Thanks, Susan
