Jason,

These are the changes that Joe has made so far.

Regards,
Richard

Hi Richard:

As promised, I will send you my redlines in pieces. Attached is the front part of the report: Abstract, Executive Summary.

On page 5, you mention NUREG/CR-2239 and NUREG-1150 (1982 Siting Study) without citing them. They are numbers 4 and 5 in the References and should be numbers 1 and 2 if you are numbering these references in the order they are cited in the text.

Joe

Joseph,

Information in this record was deleted
in accordance with the Freedom of Information
Act, exemptions Ex 6, Outside of Scope
FOIA- 2011-0083

Please see attached for the main SOARCA document. Could you please start undergoing technical editing of this document, and if possible, give us your comments chapter by chapter? As discussed before, if possible, could you please finish your review (except for resolution of comments by COB 10/26)?

Thanks,
Richard

Subject: Main document

Richard,

After a truly maddening time figuring out the arcana of MS Word header numbering and styles, I have the autonumbering working again for the main document. Attached is the native MS Word 2007 for your use. As we discussed, the NRC now has the configuration controlled version of the main document and I will lock down the version that we have on this end until the NRC technical editors have finished. I will attach pdfs of this version of the main document and the comment resolutions for the main document for your use in a separate e-mail.

Please give this a close read this weekend as a fresh set of eyes is very valuable at this stage.

Best regards,

Shawn
