Subject: Needed SOARCA Items

Follow Up Flag: Follow up
Flag Status: Flagged

Pat,

Here is what is cooking for SOARCA:

Needed to get document done

1. Revised SOARCA 189
2. Draft Final SRV writeup by this Friday (1/28)
3. Randy circling back to Jason and Charlie on final resolution of the Barium issue (1/28)
4. Finalization of addressing Appendix A Peer Review Comments/ Plant Fact Check Comments (by 2/18)

Needed, but not to finalize document

1. K. Vierow's slides/ Randy Gauntt's slides (now)
2. List of Peer Review Comments and their resolution [pending or completed] (Friday)
3. Concurrence of Chapter 1 of main report (March)

Items that NRC owes Sandia:

1. Review of MACCS and SST1 writeup for SNL

Jason is busy with three main things this week and next:

1. Review of the MACCS and SST1 writeup for SNL;
2. Working with Sandia on sending questions to the plant for the ISLOCA scenario
3. Working to ensure ISLOCA scenario is modeled correctly
4. SRV writeup

Charlie is going to be tied up with this Blue Ribbon Commission Meeting this week and likely next. When he is free I will ask him to write the ECMT/ ECST issue resolution, and review items Sandia has sent in, as well as drafting up chapters of Appendix A.

Richard's work items next week:

1. Send up revised Comm plan after the extension request has hit the Commission
2. Work on brochure revisions (pending)
3. Start compiling RIC slides and scheduling pre-briefs with Kathy- Jennifer/Brian prior to DEDO brief
4. Ensuring that the Comm TA brief is scheduled.

Thanks,
Richard Chang
