SUMMARY

This conversation took place between Bill Lin of the Materials Inspection Branch for the NRC and Dr. Jack Juni, the radiation safety officer (RSO) for Miller Technical Services. Mr. Lin attempted to perform an unannounced routine inspection on 09/13/2012. The inspector was unable to gain access to the facility where radioactive materials were used. Per conversation with the RSO, he is not physically located at the Miller Technical Services location, and therefore the best way to gain access to the facility is schedule an appointment in advance.

The inspector had discussed the possibility of announcing the inspection with the Materials Inspection Branch Chief. She agreed that due to the difficult nature of gaining access to the facility, the next inspector can announce the inspection. Another inspector will visit the facility during the week of October 1, 2012-October 5, 2012.
