

MC 573846

License No. 08-08371-05

Docket No. 030-22261

SUBJECT: Corrective action in response to NRC's SELF-ASSESSMENT OF RECORD TRANSFERS FOR MATERIAL LICENSE TERMINATIONS- August 2010 to August 2012. An observation that additional documentation for a license termination decision could have been added to the file.

No records relevant to 10 CFR 30.51 (d) were needed from the licensee because a records review of their possession of any long lived byproduct materials did not indicate disposals requiring records be maintained under 10 CFR 20.2003, 20.2004, or 20.2005. All disposals were LLW to a broker. This was confirmed with the licensee by e-mail dated September 26, 2012 from the licensee representative Glynnis Bowman, RSO and by interview on September 20, 2012 between the former RSO Dr. Chen and Elizabeth Ullrich, Sr. Health Physicist, NRC Region I.
