Bob,

Thanks. I will make sure we get our answers from the plants as soon as we respectfully can (given that they are volunteering this information).

I appreciate all of your insights into this project by the way!

Regards,
Richard

Richard

You need to let me know when all the documents are in the reading room and how to get there. I am running out of time, I will be away 3 weeks over February and March and I will be taking a (b)(6) (b)(6) I need to finish my writeup for you as soon as possible so Jason and Charlie can review and comment.

Bob,

If it is okay with you, I will keep our conference call for Wednesday. Do you think I could get your open questions to the plant by noon today? I would like to send them out soon.

Thanks,
Richard

Rich

I am working at home tomorrow and Wednesday. I should finish my write-up tomorrow morning. I suggest that we have the conference call tomorrow afternoon or Wednesday. I will be in on Thursday if you need me to come over to house.

Bob,

Can I move our ISLOCA conference call to tomorrow?

Thanks,
Richard

Bob,

Jon Ake got back to me on our request on seismic question for the Japanese plant... please see attached.

Thanks,
Richard

Subject: Seismic Question

John,

I had a question for you- for the seismic event at the Japanese power plant... so do you know if:

1. They lost all the volume from their water tanks (e.g., emergency condensate storage tank)?
2. How many g's the seismic event was?

Thanks,
