Subject: Timeline for Thermal Conductivity Request for Supplemental Information

Chris,

After reviewing the RSI's dated September 18, 2012 regarding our Application for Amendment to Materials License No SNM-2506, Docket No. 72-10, we have concluded that we will be able to respond to all 5 of them no later than October 26, 2012. Xcel Energy and Transnuclear agreed that a sensitivity analysis might be helpful to developing a full and responsive explanation to the questions. This additional calculation requires the response be reviewed under TN's Quality Assurance program. We subsequently requested that all information they provide us in response to the RSI's be reviewed under their Quality Assurance program. Once completed, Xcel will then need some additional time to perform our concurrence review and complete our signature process.

Please feel free to contact me if you have any questions.
