Subject: RE: revised RA and EA for final rule on Distribution of Byproduct Material

I had no other comments.

Subject: revised RA and EA for final rule on Distribution of Byproduct Material

Susan and Leslie,

I hope to have the revisions to the Commission paper and FRN completed soon (The Standing Committee for Compatibility is having a meeting this afternoon to make final decisions on their recommendations.)

I thought I could get you these two documents to show revisions from the Office concurrence versions. These are mainly based on comments received from ADM; however, I had also neglected to revise the numbering within 30.32(g) consistent with changes to the FRN, and in the RA, I thought I needed to add just a bit on the changes from the proposed rule.

Leslie, other suggested edits either changed the meaning slightly or at least the emphasis, or seemed to add words unnecessarily; I believe I have done everything of importance.
