Subject: RE: EDO required changes to SECY on Final rule: Distribution of Byproduct Material

Cathy,

My minor edits are attached. You have NLO subject to these edits. You will need to resubmit any documents that change to ensure that the NLO continues.

Subject: EDO required changes to SECY on Final rule: Distribution of Byproduct Material

Brad,

EDO required us to shorten the SECY for the final rule. Could you please take a quick look at the revised SECY and reconfirm NLO. I have included a redline/strikeout version so you can see what was done. Basically I have extracted the discussion of Agreement State comments

making it Enclosure 1 (with no editing), shortened the discussion of the issues from nearly 4 pages to two and deleted a few other small details.

We had been waiting for further comments/direction from OEDO and have now been told to send up the shortened paper ASAP.

Thanks,

Cathy Mattsen
