Dear Mr. Haas:

Thank you for taking the time to speak to me about the Off-Site Recovery and SCATR Programs. The programs are being "advertised" by CRCPD to aid licensees in the recycling and/or disposal of their sealed sources. I have attached the notice which contains information about the programs and hyperlinks to assist you. As they point out in the notice, think of it as an opportunity to register your sources for some future time of need. If you need further assistance, feel free to call me.

Vermont Licensees

Congratulations, you now have a disposal site to which you may ship your waste. Even if you do not wish to ship waste right away, you are encouraged to register any sealed sources you may have awaiting that day with the Off-Site Recovery Program (OSRP). The SCATR Program was specifically conceived to provide a hassle free mechanism to assist sited states in the disposal of their radioactive waste. The CRCPD will provide, at no cost, the organization of a collection of your waste and others, solicit bids for disposal, select the most cost effective bidder and, if necessary, also assist in the payment of the collection and disposal costs for the wastes. The following paragraph will assist you in registering your sources. Should you have any questions about how the program works, please call or email Russ Meyer at (512) 761-3822 or rmeyer@crcpd.org.

You may register or update your source inventories for the SCATR Program at the following web sites.

If you have a large number of sources or devices containing sources to register you may wish to use the downloadable spreadsheet at <http://osrp.lanl.gov/SCATRTemplate.xls> and then email it to the address given on the spreadsheet.

If you do not have many items to list you may want to register online real time. The website where this can be done is <http://osrp.lanl.gov/PickUpSources.aspx>.

If registering online please have the following information about each source handy:

Isotope, original activity, current activity, manufacture date, manufacturer, model number, serial number, and physical dimensions.

There is no commitment by signing up, think of this as a hedge. When a collection is planned, you will be contacted to determine if you wish to participate at that time.
