**Subject:** RAI, Source Information

(NOTE: This will be used as the Documents Title in ADAMS)

I called Mr. Weisberg and discussed general licensed and specific licensed materials. He had listed on the license generally licensed devices but in his discussions due to the need of moving the devices, he really needs specifically licensed devices. We discussed getting with the manufacturer to convert these to specifically licensed devices. He requested that we place all gas chromatograph specifically licensed sources from Agilent on the license for the requested model numbers. I also asked for the last sealed source leak test and verification that the materials were received for his Fe-55, Cd-109, and Am-241 devices.

**Action Required: Mr. Weisberg would send in the information as described above.**
