SUBJECT: WOLF CREEK GENERATING STATION – NRC SECURITY INSPECTION
REPORT 05000482/2012404

Dear Mr. Sunseri:

On September 13, 2012, the U.S. Nuclear Regulatory Commission (NRC) completed a security baseline inspection at your Wolf Creek Generating Station. The inspection covered one or more of the key attributes of the security cornerstone of the NRC's Reactor Oversight Process. The enclosed inspection report documents the inspection results, which were discussed on September 13, 2012, with Mr. J.P. Broschak, Vice President Engineering, and other members of your staff.

The inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and with the conditions of your license. The inspector reviewed selected procedures and records, observed activities, and interviewed personnel.

There were no NRC-identified or self-revealing findings identified during this inspection.

However, a licensee-identified violation which was determined to be of very low security significance is listed in this report. The NRC is treating this violation as a non-cited violation (NCV) consistent with Section 2.3.2 of the Enforcement Policy.

If you contest the violation or significance of the NCV, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington DC 20555-0001; with copies to the Regional Administrator, Region IV; the Director, Office of Enforcement, United States Nuclear Regulatory Commission, Washington, DC 20555-0001; and the NRC Resident Inspectors at Wolf Creek Nuclear Generating Station.

"Enclosure transmitted herewith contains SUNSI. When separated from enclosure, this transmittal document is decontrolled."
