

MEETING/TELCON NOTES

Date: 10/26/2012

Organization: Lost Creek ISR, LLC

Subject: yellowcake

Contact: John Cash

Personnel Involved: Alan Bjornsen

Summary: for dry yellowcake:

- dryers produce 1 million lb per yr when operating 12 hr/day, 6 days/week
- based on a load limit of about 36,000 lb per truck about 25-30 trucks per year would leave facility
- each drum has a load limit of about 380 lb for yellowcake slurry

- # of trucks depends on the solids content and specific gravity of the slurry, as well as the weight of the truck (slurry trucks are thick-walled)
- at a solids content of 70%, approximately 70 trucks per year would leave the facility
- these 70 trucks equate to a production of 2 million pounds of yellowcake
