Subject: RAI regarding amendment request

(NOTE: This will be used as the  
Documents Title in ADAMS)

The licensee was called to request additional information. The licensee wanted to do a growth study using C-14 labeled chemicals. In order to complete the review, the NRC would need (a) confirmation that there would be no release to the environment; (b) the project description to ensure proper controls are in place to minimize contamination; and (c) a description of the waste disposal methods. During the conversation, Ms. Sakimoto stated that after further review of the project they decided they did not wish to pursue the amendment. Therefore, the amendment will be voided without prejudice to the resubmission of another amendment request when they have all the information. The license reviewer stated she will reiterate in the void letter the information needed to complete the action.
