Subject: Call with the Chairman and the Deputy Secretary

Joyce, nice to talk with you yesterday. Chairman Jaczko would like to speak with Deputy Secretary Ponemon about three issues:

- 1) DOE's responses to NRC requests for additional information (expected July 31) regarding incidental waste disposal at the Savannah River Site.
- 2) Aerotest – the NRC staff has issued an order to Aerotest to complete the pending sale to remove foreign ownership – a remaining issue is who will take title to the spent fuel.
- 3) Ongoing efforts to develop an MOU between our agencies on the security oversight of MOX fuel.

I've copied the Chairman's scheduler Patti Pace so she can also reach out to the Deputy Secretary's assistant to schedule a call since issue #1 is time sensitive.

Please let me know if you have questions.

Thank you,
Josh
